Superior AI Solutions for Corporates

“Everything we love about civilisation is a product of intelligence, so amplifying our human intelligence with artificial intelligence has the potential of helping civilisation flourish like never before—as long as we manage to keep the technology beneficial.”

Max Tegmark
Swedish-American physicist

Milan Veskovik
CEO overmind.one

"We discover hidden potentials by merging process relation management with latest AI technology."

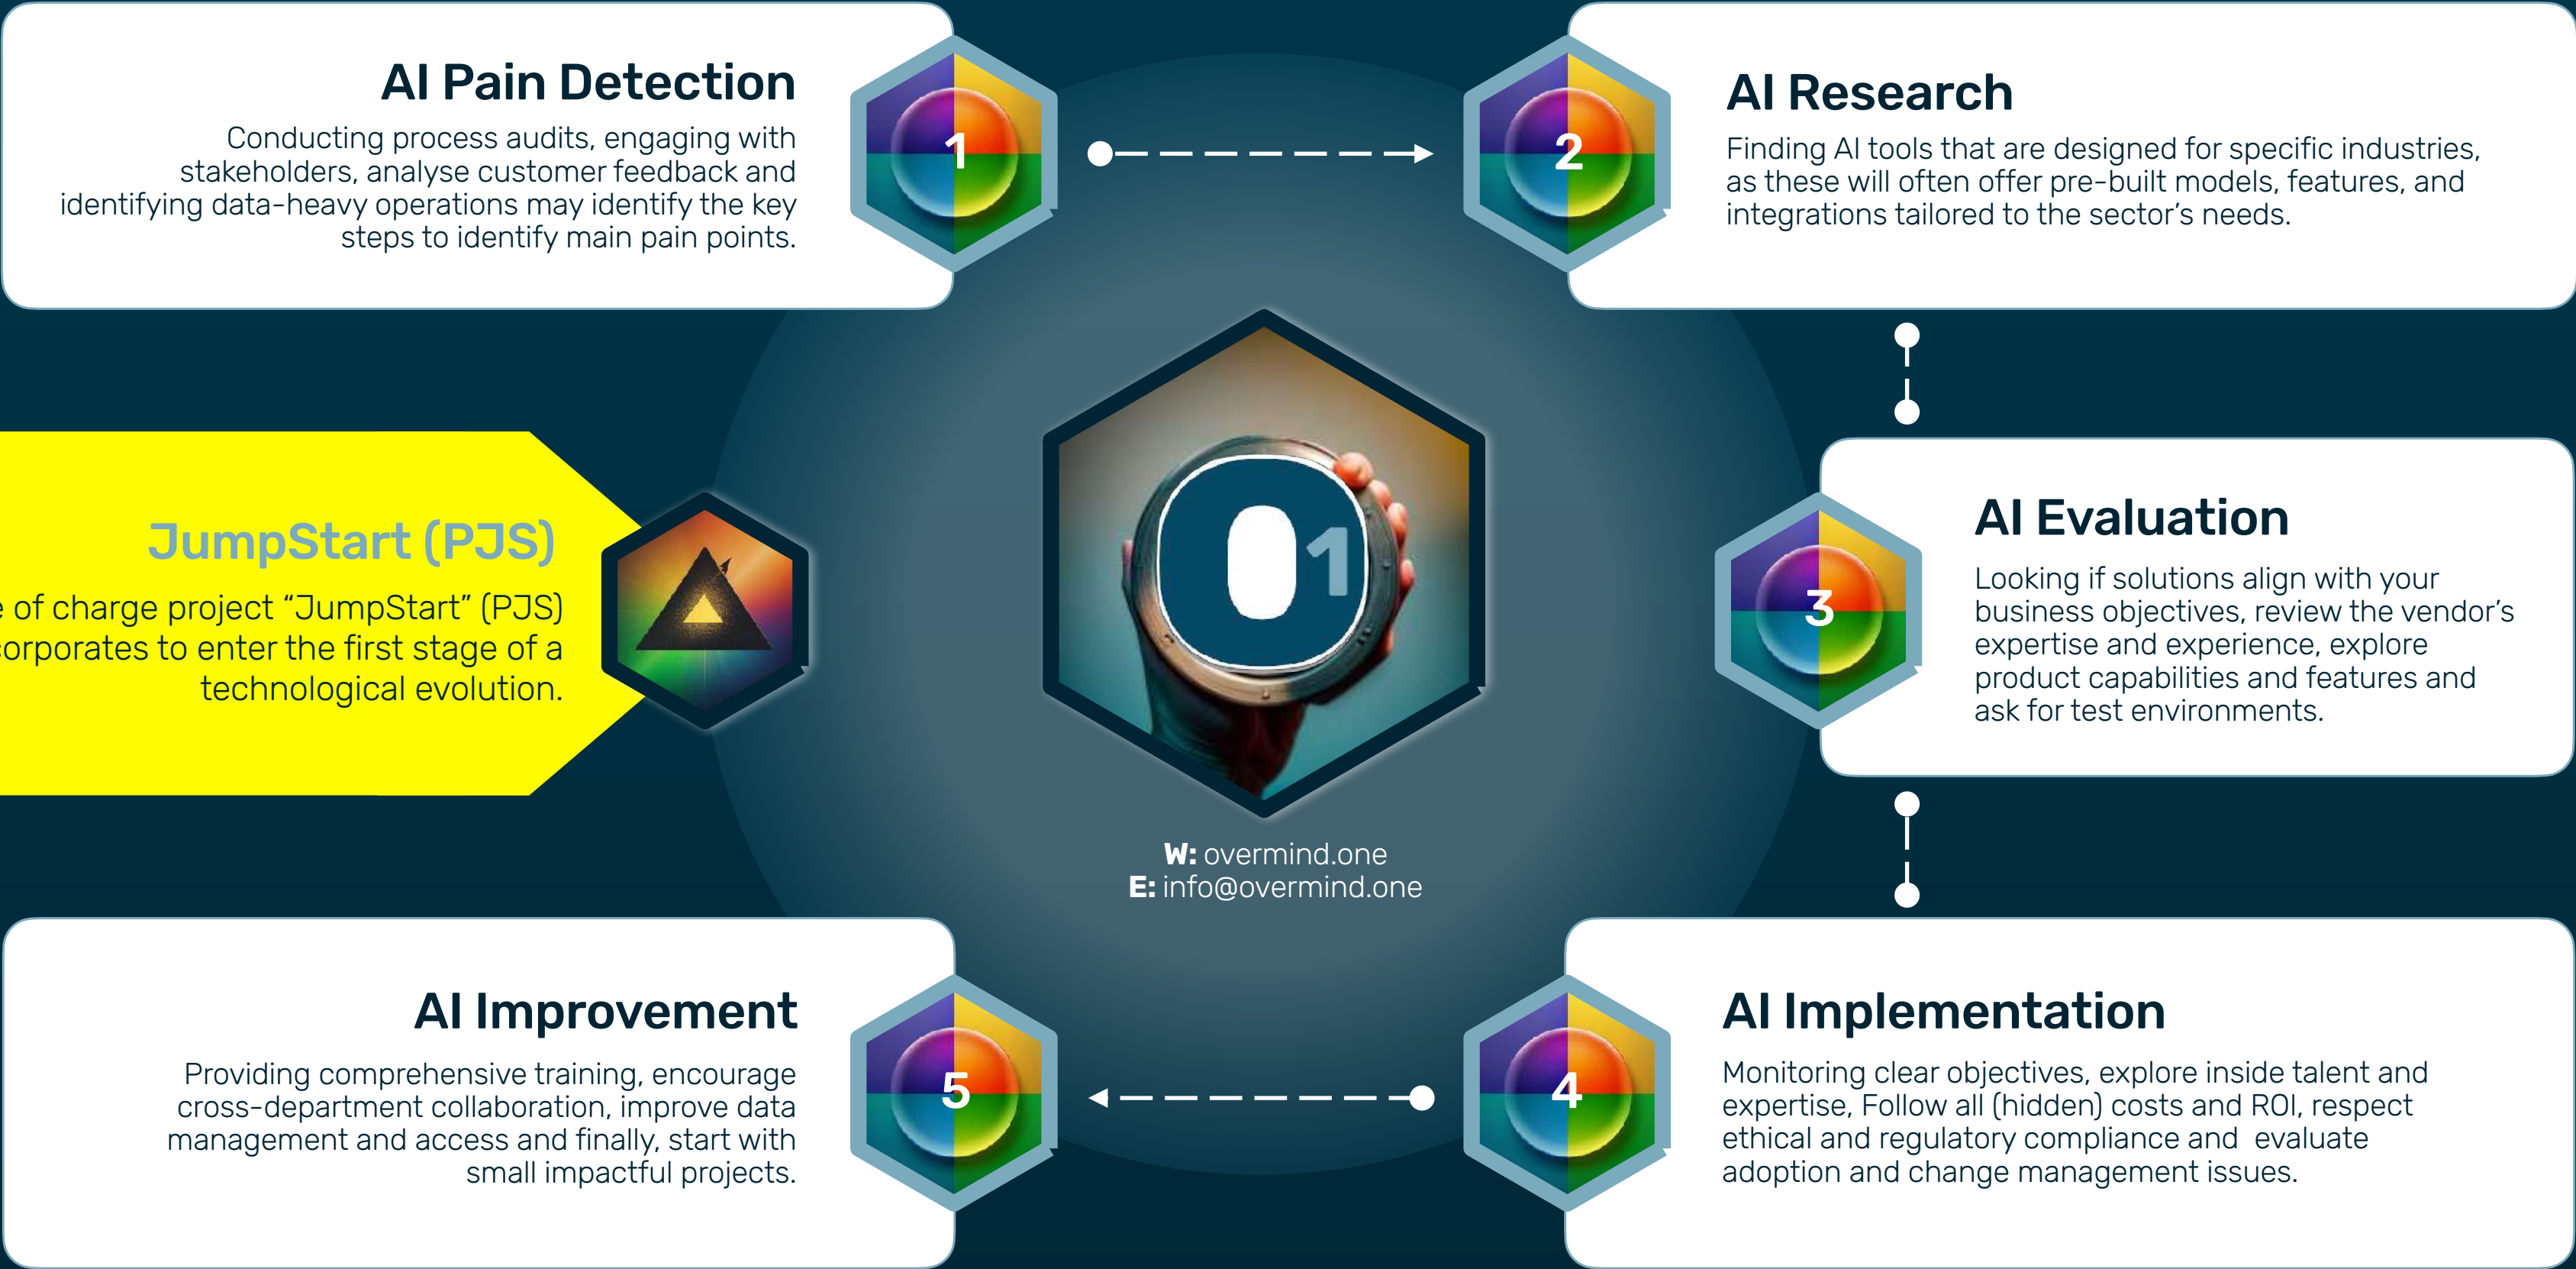

Our dedicated partners

“We translate corporate challenges into latest technology”

We take care about

- + lean processes
- + regulatory compliance
- + the human side of AI adoption
- + market-proven technology

70%

Up to 70% time savings: For repetitive and data-heavy tasks, such as document review or data entry, AI-based automation often results in major time reductions.

25%

Up to 25% reduction in operational costs: By reducing manual labor, errors, and inefficiencies, AI can lower operating costs in areas such as customer service (via chatbots) and financial processing.
