

TalkToProcess

Get routine work done by voice. Stay in control.

Describe the task. Confirm the details.
TalkToProcess checks permissions and reports
what actually happened in your system.

Your permissions. Your approval process.

A

A spoken request

"Create a materials request
for job 4711."

Check. Confirm. Execute.

Details and permissions checked.
You confirm before execution.

B

A traceable result

Draft created in your system.
Existing approval process continues.

Start with one low-risk action, one role and one system.
