VARIANT T

TalkToTrain Scenario Workshop

Three situations, observable criteria and another attempt.

Pilot concept with a training partner.

VARIANT T

Outcome and agenda

240 minutes as a planning assumption.

Build scenarios, calibrate criteria, practise and plan transfer.

VARIANT T

An observable learning goal

Which action should succeed?

Which missing information must be requested?

Which boundary must be recognised?

VARIANT T

Three different demands

Clarify the need.

Avoid an unauthorised commitment.

Improve an incomplete handover.

VARIANT T

The role card

Choose the case, attempt and role in the facilitator library.

Share only the individual card. Each role receives its own facts.

Issue fresh cards for the changed second attempt.

VARIANT T

A new condition

One detail changes.

The previous answer may no longer fit.

A justified question can demonstrate progress.

VARIANT T

Evidence for assessment

0: required action incorrect or omitted

1: correct after specific help

2: correct and appropriate without help

Leave unobservable criteria unscored

VARIANT T

Role rotation with a personal attempt

Triads or groups of four according to group size

5 minutes attempt, 3 feedback, 2 repeat

Everyone acts as learner in a suitable mode

VARIANT T

Useful feedback

Self-assessment first.

Then one concrete observation.

Test one change in the next attempt.

VARIANT T

Transfer beyond wording

A related new task.

Explain the decision and its boundaries.

Supervise practice where needed.

VARIANT T

Subject-matter approval

The training partner checks facts and rubric.

Learners understand the purpose of feedback.

AI feedback remains open to expert review.

VARIANT T

Next trial and maintenance

Small learner group and explicit sources.

Version, owner and revision date.

Discuss progress together.
